Excel	: Pivot Tables, Formulas, Data Cleaning, Dashboards
Python	: Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA
Core Skills	: Data Cleaning, Data Visualization, Problem-Solving

CERTIFICATION

Data Analytics Certification

TeqCertify (Certification No : 22DA-12013 Earned on: Nov 24,2025)

ChatGPT for Data Analytics

Simplilearn SkillUP Earned on: Nov 17,2025

PROJECT EXPERIENCE

Power BI Projects

- **HR Analytics Dashboard (Capstone Project):**

Developed a dynamic dashboard to visualize employee demographics and attrition patterns, enabling data driven workforce insights.

- **Electric Vehicle Data Dashboard:**

Created a Power BI report to study EV sales growth, top manufacturers, and state-wise adoption, showing rising interest in electric vehicles.

- **Uber Analysis Dashboard:**

Built a Power BI report to study ride trends, popular vehicle types, and payment methods, identifying peak hours and days for higher bookings.

SQL Projects

- **Restaurant Data Analysis:**

Used SQL to analyze sales performance by item, cuisine, and time, revealing top-selling products, weekday revenue patterns, and improvement areas for underperforming categories.

- **Pizza Sales Analysis:**

Used SQL to analyze pizza sales data, identifying top-selling items, peak order times, and customer spending patterns to understand overall sales performance.

- **World Cup Data Analysis:**

Analyzed World Cup data using SQL to find top-performing teams, host nation impact, and leading goal scorers across different tournaments.

Excel Projects

- **Coffee Shop Sales Analysis:**

Developed an interactive Excel dashboard to analyze hourly, weekly, and category-wise sales trends, identifying peak demand times and best-selling products to support business insights.

- **Call Centre Data Analysis:**

Created an Excel dashboard to analyze representative performance, customer ratings, and call trends by location and time, providing insights into service efficiency and Customer satisfaction.

- **MTA Ridership Data Analysis:**

Created an interactive Excel dashboard to analyze ridership trends across transport modes and weekdays, identifying commuter patterns and peak usage periods.

Python Projects

- **Diwali Sales Analysis:**

Analyzed festive season sales data using Python to identify top customer segments, high-performing states, and popular product categories for targeted marketing insights.

- **E-Commerce Data Analysis:**

Combined SQL and Python to clean and analyze sales data, identifying top locations, peak sales periods, and best-performing product categories for business insights.

- **Airline Loyalty Analysis:**

Integrated Python and SQL to analyze airline loyalty data, uncovering insights on customer behavior, revenue contribution, and cancellation trends to improve retention and rewards strategy.
